

I may not be a highly educated person but I can't figure out why you would want to change our area code by counties instead of changing it where Rochester Telephone lines are because that is a long distance call to us any way. If things change now what will happen to the people in the Arcade Area that our exchange(492)is spread over a 3-county area? I hope you understand what I am trying to say. I think this would be an easier solution to your problem. Why do you want to make everytinhg so complicated?
